

NuTech Synergies

O&P Technology Accelerator

WHO WE ARE

After spending decades in the O&P industry, our knowledgeable team sees a gap when it comes to supporting new technologies entering this unique, niche market.

We collaborate with our Technology Partners to help them connect with O&P patients, clinicians, and practice owners through a customized Services Plan.

Without US O&P market knowledge and experience, new technologies can very likely struggle within this saturated, vertically integrated US O&P field.

WHY CHOOSE US?

The NuTech Team has experience from all areas of the O&P profession - clinical, research, sales, marketing, reimbursement, manufacturing, and more. Our unique team has well over 200 years of experience in the O&P industry. We know what it takes to create a successful product in this market because we've helped do that many times over the past 30 years.

SOME OF OUR SERVICES

- Product Development Support
- Strategic US Healthcare Reimbursement Review
- In-Facility & Online Clinical Training
- In-Facility, Evangelical Sales & Marketing Support
- O&P Tradeshow Exhibition Collaboration
- Post-Sale Support with Loaner & Repair Services

NUTECH INSTITUTE

- O&P Patient Care Clinic Focused on Patient Outcomes and New Technologies
- Clinical Patient Research with Industry, Universities, DOD, & the VA
- Real-World Patient Product Field Testing by Licensed, ABC Certified, Clinicians
- Passionate Focus on Patient Outcome Data Gathering
