Benefits

Direct-Fit on Patients

Ultra-Lightweight

Fast System

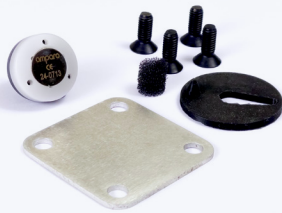

Remote Fitting

Premium Fit & Finish

Fully Remoldable

Button One Way Valve

Easily interchangeable between suspension types

The Resilience Socket is compatible with all suspension methods currently used by clinicians and their patients. Make it simpler to create a prosthetic device regardless of whether the suspension method is suction, pin lock, or active vacuum.

Elevated Vacuum

Pin Lock

FREE ON-SITE TRAINING

We can arrange group or individual training at your facility. With one of your patients we can fit a pin or valve socket depending of your choice and help you for the first fitting. The mobile clinic will allow us to do it anywhere.
